DEPARTMENT OF EDUCATION, EMPLOYMENT AND WORKPLACE RELATIONS

Section 1: Agency overview and resources

1.1 STRATEGIC DIRECTION

The department provides advice to the government and administers programs to achieve government objectives for education, employment and workplace relations. The department works in partnership with the states and territories, non-government authorities, providers and industry towards achieving five outcomes. These are detailed in Figure 1.

The Outcomes summarise objectives the government is seeking to achieve in its agenda for improving Australia's economic performance and social well being. The government's productivity agenda incorporates an education revolution, workplace relations reform, workforce participation and social inclusion.

Through the Education Revolution the government aims to provide universal access to a high quality education from the earliest age, world-class teaching and learning in schools, and effective training and life-long learning opportunities through education providers such as universities, TAFEs and in the workplace. To support this process, the government is committed to Information and Communication Technology (ICT) to ensure that every Australian secondary school graduate has the skills and opportunities to secure tomorrow's jobs.

The government's education reform agenda focuses on equity and access, diversity, choice and the highest quality education.

The government's workforce participation and social inclusion agendas reinforce each other as important contributors to productivity growth. The government strategy aims to enhance employability through acquisition of labour market skills and knowledge and participation in society and the economy. The strategy is supported by investment in employment and training services for the unemployed and the disadvantaged.

DEEWR Budget Statements - Overview & resources

The social inclusion agenda is underpinned by investment in human capital to address disadvantage across communities in Australia. This agenda includes closing the gap between Indigenous and non-Indigenous communities in employment and education. The government is addressing these issues by providing opportunities for disadvantaged individuals and communities to participate in society and by working to improve collaboration between governments, communities and employers. For example, it is removing disincentives and barriers to labour force participation and increasing participation in tertiary education of students from low socio-economic backgrounds.

The government's agenda on workplace relations aims to raise productivity and restore fairness in the workplace. Following the passage of the *Transition to Forward with Fairness Act 2008*, the department is working on implementing the government's new industrial relations framework to replace Work Choices. A new workplace relations system will be fully operational from the beginning of 2010. It will provide a uniform set of industrial relations laws for the entire private economy of the nation. The new system will encourage flexible enterprise agreements and create new flexibilities for common law agreements and modernised awards.

The government has achieved agreement at COAG on a number of National Partnerships that will commit the Australian and the state and territory governments to achieving specific targets that raise educational attainment and qualifications of all Australians and close the gap for Indigenous Australians particularly in education and employment.

On 26 March 2008, COAG agreed to implement the new Federal Financial Relations Framework, commencing on 1 January 2009. This framework has been introduced to ensure effective implementation to achieve these targets.

On 29 November 2008, COAG reaffirmed its commitment to the new financial framework for federal financial relations and agreed to a substantial funding package to underpin the financial framework reforms. These reforms are being implemented through a new Inter-Governmental Agreement that covers the Commonwealth's financial relationship with the states. Under the new framework, all payments to the states, with few exceptions, will be made by the Commonwealth Treasury to the State Treasuries.

The Inter Governmental Agency Agreement on Federal Financial Relations represents one of the most significant reforms to Australia's federal financial relations in decades. It is aimed at improving the quality and effectiveness of government services by reducing Commonwealth prescriptions on service delivery by the states, providing them with increased flexibility in the way they deliver services to the Australian people. It provides a clearer specification of the roles and responsibilities of each level of government and an improved focus on accountability for better outcomes and better service delivery.

For the purposes of payment arrangements, schools, VET and child care programs have been split with the government portions being managed by Treasury, and DEEWR retaining policy and payment administration responsibility of the payments and estimates for the non-government portions of program expenditures. The presentation of the Portfolio Budget Statements has been amended to reflect this change.

The department has responsibility for a central part of the government's strategy which aims to provide a sustained increase in the quantity of investment, and the quality of outcomes across the education, skills and training systems. The government priorities provide the basis for the department's 2008-2011 Strategic Plan consisting of the following five elements:

- A positive start in life.
- A brighter future through education.
- A highly skilled, educated and productive community.
- A participative and inclusive society.
- A safe, fair, productive and successful workplace.

In 2009-10, the department will be working to assist the government to achieve the above challenges through the delivery of the following major initiatives:

- The Digital Education Revolution - a \$1 billion National Secondary School Computer Fund to provide high speed broadband to schools and computers at school for all students from years 9 to 12.
- Reform across the higher education and innovation systems in response to the Bradley Review of Higher Education and the Cutler Review of the National Innovation System is designed to drive a greater focus on students and their needs, an increased emphasis on quality teaching and learning and increased participation by students from disadvantaged backgrounds.
- Trade Training Centres in School Program - funding of up to \$1.5 million per high school to establish trades training centres at every Australian secondary school.
- Monitoring economic conditions, including the global financial crisis and evaluating where the department's programs can address changes in labour market conditions and industry skills needs.

DEEWR Budget Statements - Overview & resources

- Smarter Schools – Literacy and Numeracy - \$577 million over four years for a new Succeeding in Literacy and Numeracy Grants program to provide targeted literacy and numeracy assistance to school students.
- Smarter Schools – Low SES Schools NP - \$56.4 million over four years to expand intensive literacy and numeracy programs to assist Indigenous students who are underachieving.
- Smarter Schools – Quality Teaching (National Partnerships).
- The introduction on 1 July 2009 of new employment services arrangements through Job Services Australia.

The global economic recession is impacting on every community within Australia. Some groups of Australians are being affected more than others and need additional assistance, for example, some Indigenous Australians, people with disabilities and jobless families face barriers to success that other Australians do not and these are being magnified in the current economic environment.

In December 2008, the Government announced a \$4.7 billion Nation Building package to stimulate the economy. In February 2009 the Government announced a further \$42 billion Nation Building and Jobs Plan to support jobs and invest in future long term economic and productivity growth. These measures were all designed to support jobs and working families as well as productivity growth for the long term.

1.2 AGENCY RESOURCE STATEMENT

Table 1.1 shows the total resources from all origins. The table summarises how resources will be applied by outcome and by administered and departmental classification.

Prepared on a Government Financial Statistics (fiscal) basis.

1.4 TRANSITION FROM OUTCOMES AND OUTPUTS TO OUTCOMES AND PROGRAMS

From the 2009-10 Budget, all General Government Sector (GGS) entities will be reporting on a program basis. The table below outlines the transition from the 2008-09 Budget year (as at Additional Estimates) which was presented in administered items, outputs and output groups to the program reporting framework used for the 2009-10 Budget. The table also captures revisions made to GGS outcome statements under the Operation Sunlight Outcome Statements Review.

Figure 2: Transition table

Program 2.11: School Student Assistance ABSTUDY Secondary Assistance for Isolated Children Youth Allowance Superannuation Benefits for Aboriginal Tutor Assistance Scheme

Notes:

1. From 1 January 2009, there are no separate administered items under Program 2.1. The National Education Agreement incorporates supplementary funding to government schools (previously known as specific purpose payments for Recurrent Grants, Capital Grants and Targeted Programs) and includes a number of Indigenous education programs previously implemented under the Indigenous Education (Targeted Assistance) Act 2000. Refer Section 2, Outcome 2 for further information.

2. New National Partnerships agreed in 2009

3. Administered items from Outcome 5 in the 2008-09 structure were transferred to the new Outcome 2.

Refer Outcome 5 Transition table for details.

1.5 PROGRAMS FOR WHICH TREASURY IS APPROPRIATED UNDER THE NEW FEDERAL FINANCIAL RELATIONS (FFR) FRAMEWORK

The Council of Australian Government (COAG) has agreed to a new framework for Federal Financial Relations that is being implemented in a staged manner from 1 January 2009. Under these arrangements specific purpose payments (SPPs) will now be made through combined monthly payments from the Commonwealth Treasury to and through State and Territory Treasuries.

Details of payments which were previously the responsibility of the Department of Education, Employment and Workplace Relations and are now being made by the Treasury are summarised below, along with resources that continue to be held by the agency. Further information on the Federal Financial Relations arrangements can be found in the Portfolio Budget Statements of the Treasury and in Budget Paper No. 3, Australia's Federal Relations 2009-10.

DEEWR Budget Statements - Overview & resources

Table 1.3: Programs for which Treasury is appropriated under the new Federal Financial Relations (FFR) framework and remaining agency resourcing.
