Hi

well the issues which we discussed at roundtable and at the meeting few days back were the only issues that mainly students face.

Transportation issue should be governments first priority. the uniform policy of concession in transport should be adapted in all the states. it could buy the government some time and respect with the international students.

the next very important issue is the social inclusion one. the government should allocate some funds to some TAFE institutes to introduce some social activities like debating societies, music clubs, drama clubs. that will help the international students and local students to com close to each other and it will also help them to know each other's cultures.

Scholarships should be introduced at Tafe level for international and as well as undergraduate level.

There should be students union for TAFE students

OR

There is a solution of many problems. with that one solution government can overcome many issues. the government can start social inclusion programs, scholarships and many new projects with one step.

The government should start a student body that works WITH THE GOVERNMENT. they should let that body run an office in the city or easy to access place where all the international students should report and can have guidance. That student body should be run by international students and can take up issues from the government's side to all the students.

i have with me some project details and if the government need my assistance i will be honoured to help them.

Regards
Asfand
