

Read the scenarios below and discuss each problem.

Scenario 1

Jordan is walking back from the school canteen after buying an ice-block. An older boy in front of him is putting his change back into his wallet after buying some chips. He rushes to meet his friends but does not notice a \$2 coin fall out of his wallet. Jordan spies the coin on the ground and picks it up.

What is the problem? What should he do?

Scenario 2

Natalie is practising her dancing in the lounge room when she accidentally knocks Mum's pottery bowl onto the carpet, where it cracks.

What is the problem? What should she do?

Scenario 3

Jason and Timothy are in the same class. Declan is a year older and is in a different class. Jason is getting ready to line up after lunch when he notices Declan with his hand in Timothy's bag.

What is the problem? What should he do?
